PROFILE

Full-stack software engineer with 2+ years building enterprise platforms: metadata-driven React interfaces and Node.js/NestJS APIs. Shipped 1,200+ automated tests and 300+ API endpoints across four team-built products.

SKILLS

Frontend: React, Next.js, Angular, TypeScript, HTML, CSS, SASS, Redux Toolkit, Material UI, Tailwind CSS
Backend: Node.js, NestJS, Express, GraphQL, Socket.io, Redis, BullMQ, JWT, OAuth 2.0
Data: MongoDB, PostgreSQL, SQL, Prisma, MySQL, SQL Server, AWS S3
Testing & DevOps: Jest, Vitest, Jasmine, Docker, Nx Monorepos, GitHub Actions, CI/CD
Programming languages: JavaScript, TypeScript, Python, C
Practices: Agile / Scrum, OOP, SOLID, Design patterns, REST and GraphQL API design, Git, Linux

WORK EXPERIENCE

Full Stack Developer

Arkaan International Group Co. - Full-time — Dec 2025 - Present

- Engineered dynamic UI components rendered entirely from JSON metadata schemas, reducing manual frontend coding effort by ~40%.
- Developed configurable form builders that auto-generate layouts from backend data models, cutting form development time by ~70% across 5+ form types.
- Built a high-performance rendering engine mapping server-side metadata to reusable React components, supporting 10+ reusable component types application-wide.
- Led the front end of a client procurement platform and designed its interface in Figma.

Backend Developer

Qyser Tech. - Part-time, Remote — Sep 2024 - Mar 2026

- Architected modular backend services with Node.js and REST APIs, serving 500+ concurrent API requests.
- Built dynamic report generation features with complex queries and aggregations, processing across 100K+ records.
- Delivered the "Performance" feature using MongoDB aggregations to generate employee insights and support admin approvals, cutting manual HR reporting time by ~60%.

PROJECTS

SmartShift: Shift-scheduling platform for hospitals

Full-stack engineer, API lead - Team project — Oct 2025 - Nov 2025

- Built the CI/CD pipeline in GitHub Actions (Nx lint, test and build on each push) and deployed the Dockerized API to the cloud on Heroku.
- 76 / 102 API commits authored; 3 apps: API, React, Angular.

Technologies: Node.js, Express, MongoDB, React, Redux Toolkit, Angular, Nx, Docker.

Signoff - Content Management System: Content platform for editorial teams

Full-stack engineer - Own product, live — Sep 2026 - Present

- Deployed to the cloud on Vercel and Render with managed PostgreSQL, Redis and S3-compatible storage; GitHub Actions CI runs lint and tests.
- 104 unit tests passing; 20 end-to-end tests.

Technologies: NestJS, TypeScript, PostgreSQL, Prisma, Redis, BullMQ, Next.js, Docker.

Trigo - Ride-Hailing Backend: Real-time API behind a ride-hailing app

Backend developer - Delivery Quote Ltd, freelance, team project — Dec 2025 - Feb 2026

- Live locations, chat and call signaling over Socket.io, scaled across instances with a Redis adapter.
- 639 unit tests; 136 documented endpoints; 17 / 24 commits authored.

Technologies: NestJS, TypeScript, PostgreSQL, Prisma, Redis, Socket.io, Jest.

EDUCATION

B.Sc. Communication & Electronics Engineering

6 October High Institute for Engineering & Technology — 2014 - 2019

CERTIFICATIONS

Full Stack Intensive Code Camp - MEARN Stack

Information Technology Institute (ITI) — Jul 2025 - Dec 2025
