PROFILE

Full-stack engineer with 2+ years building enterprise web platforms. I specialise in metadata-driven React interfaces and Node.js/NestJS services backed by MongoDB aggregations, and I ship tests with the feature: 1,200+ automated tests and 300+ API endpoints across four team-built platforms.

SKILLS

Frontend	React, Next.js, Angular, TypeScript, Redux Toolkit, Tailwind CSS, Framer Motion
Backend	Node.js, NestJS, Express, GraphQL, Socket.io, Redis, BullMQ, JWT Auth
Data	MongoDB, PostgreSQL, Prisma, MySQL, SQL Server, AWS S3
Testing & DevOps	Jest, Vitest, Jasmine, Docker, Nx Monorepos, CI/CD
Languages	JavaScript, TypeScript, Python, C
Practices	OOP, SOLID, Design patterns, REST and GraphQL API design, Git, Linux

WORK EXPERIENCE

Full Stack Developer · Arkaan International Group Co. Dec 2025 – Present

- Engineered dynamic UI components rendered entirely from JSON metadata schemas, reducing manual frontend coding effort by ~40%.
- Developed configurable form builders that auto-generate layouts from backend data models, cutting form development time by ~70% across 5+ form types.
- Built a high-performance rendering engine mapping server-side metadata to reusable React components, supporting 10+ reusable component types application-wide.

Backend Developer · Qyser Tech. Sep 2024 – Mar 2026

- Architected modular backend services with Node.js and REST APIs, serving 500+ concurrent API requests.
- Built dynamic report generation features with complex queries and aggregations, processing across 100K+ records.
- Delivered the "Performance" feature using MongoDB aggregations to generate employee insights and support admin approvals, cutting manual HR reporting time by ~60%.
