PROFILE

Full-stack software engineer with 2+ years building enterprise platforms: metadata-driven React interfaces and Node.js/NestJS APIs. Shipped 1,200+ automated tests and 300+ API endpoints across four team-built products.

SKILLS

Frontend: React, Next.js, Angular, TypeScript, Redux Toolkit, Tailwind CSS, Framer Motion
Backend: Node.js, NestJS, Express, GraphQL, Socket.io, Redis, BullMQ, JWT Auth
Data: MongoDB, PostgreSQL, Prisma, MySQL, SQL Server, AWS S3
Testing & DevOps: Jest, Vitest, Jasmine, Docker, Nx Monorepos, GitHub Actions, CI/CD
Languages: JavaScript, TypeScript, HTML, CSS, SASS, SQL, Python, C
Cloud: Vercel, Render, Heroku, Neon PostgreSQL, Upstash Redis, Cloudflare R2
Practices: OOP, SOLID, Design patterns, REST and GraphQL API design, Git, Linux

WORK EXPERIENCE

Full Stack Developer

Arkaan International Group Co. | Dec 2025 - Present

- Engineered dynamic UI components rendered entirely from JSON metadata schemas, reducing manual frontend coding effort by ~40%.
- Developed configurable form builders that auto-generate layouts from backend data models, cutting form development time by ~70% across 5+ form types.
- Built a high-performance rendering engine mapping server-side metadata to reusable React components, supporting 10+ reusable component types application-wide.
- Led the front end of a client procurement platform: designed the interface in Figma and shipped it with 566 Vitest tests across 49 files.

Backend Developer

Qyser Tech. | Sep 2024 - Mar 2026

- Architected modular backend services with Node.js and REST APIs, serving 500+ concurrent API requests.
- Built dynamic report generation features with complex queries and aggregations, processing across 100K+ records.
- Delivered the "Performance" feature using MongoDB aggregations to generate employee insights and support admin approvals, cutting manual HR reporting time by ~60%.

PROJECTS

SmartShift: a shift-scheduling platform for hospitals.

Full-stack engineer, API lead | Team project | Oct 2025 - Nov 2025

- Built the GitHub Actions CI/CD: Nx lint, test and build on each push; Docker image deployed to Heroku.
- 76 / 102 API commits are mine; 3 apps: API, React, Angular.

Technologies: Node.js, Express, MongoDB, React, Redux Toolkit, Angular, Nx, Docker.

Signoff - Content Management System: a content platform for editorial teams.

Full-stack engineer | Own product, live | Sep 2026 - Present

- Runs on Vercel and Render with Neon PostgreSQL, Upstash Redis and Cloudflare R2; GitHub Actions CI runs lint and tests.
- 104 unit tests passing; 20 end-to-end tests.

Technologies: NestJS, TypeScript, PostgreSQL, Prisma, Redis, BullMQ, Next.js, Docker.

Trigo - Ride-Hailing Backend: the real-time API behind a ride-hailing app.

Backend developer | Delivery Quote Ltd, team project | Dec 2025 - Feb 2026

- Live locations, chat and call signaling over Socket.io, scaled across instances with a Redis adapter.
- 639 unit tests; 136 documented endpoints; 17 / 24 commits are mine.

Technologies: NestJS, TypeScript, PostgreSQL, Prisma, Redis, Socket.io, Jest.

EDUCATION

B.Sc. Communication & Electronics Engineering | 6 October High Institute for Engineering & Technology | 2014 - 2019

CERTIFICATIONS

Full Stack Intensive Code Camp - MEARN Stack | Information Technology Institute (ITI) | Jul 2025 - Dec 2025
